

**A Low-Level
Laser Educational
Symposium**

Master Priority Principle[®] to Gain Superior Outcomes

**Multi Radiance Super Pulsed
Laser Certification Course**

November 14 - 17, 2019 | Orlando, FL

About:

Come learn about the benefits of photobiomodulation therapy in beautiful Orlando. Super pulsed laser therapy is an exciting modality however it can be confusing for novice users. This Low-Level Laser Educational Symposium explores the scientific and clinical applications as it relates to current practice.

The program is designed to address the most common questions posed by clinicians while exploring all aspects of laser and light therapy including basic science, research and technical specifications of therapeutic laser/light devices. Evidence based research is presented and goes beyond the "didactic" to include practical and clinically relevant treatment techniques and protocols for users to take back to clinic and begin using immediately.

Course Objectives:

- 1 Understand the basic photobiochemical reactions to laser/light therapy, and all basic light therapy parameters necessary for successful clinical outcomes.
- 2 Review current, relevant and evidence-based literature as it relates to the efficacy of laser therapy in clinical settings.
- 3 Implement and explore protocols for administering laser therapy for a wide variety of frequent clinical conditions
- 4 Attendees that complete the course will receive a Certificate from Laser Therapy University on the use of Multi Radiance lasers.
